EDUCATION

Hofstra University

B.S. in Computer Science

New York, USA

Expected Graduation, May 2027

- o **GPA:** 3.46/4.00, *Dean's List*
- o **Related Coursework:** Data Structures & Algorithms, Computer Organization & Programming, Software Engineering, Object-Oriented Programming, Applied NLP and Text Mining, Operating Systems

EXPERIENCE

IT Technician – Systems Support Engineer

Maurice A. Deane School of Law at Hofstra University

New York, USA

Sept 2025 - Current

- **Accomplished** faster IT troubleshooting **as measured by a 15% reduction in resolution time**, by developing **Python scripts** to automate log analysis, system monitoring, and routine error handling.
- **Ensured 99% uptime** for several law school devices by configuring and monitoring networks using **TCP/IP and DNS protocols**.
- **Reduced repeat support tickets by 20%** through building a structured knowledge base, leveraging database organization and information retrieval principles.

PROJECTS

Smart Syllabus Calendar Sync | [GitHub](#) | [Site](#)

- **Engineered** a Next.js 14 application that **automatically transformed academic syllabi into interactive calendars**, reducing manual event entry time for students by **80%** through PDF parsing, date extraction, and AI classification.
- **Improved cross-platform accessibility for all users** by integrating **Google OAuth2 and ICS export** functionality, enabling seamless synchronization with **Google Calendar**.
- **Increased user engagement by 40%** through optimizing the calendar UI with **React Big Calendar and Tailwind CSS**, delivering a mobile-responsive interface with color-coded events and multiple viewing modes.

EduFlow AI | [GitHub](#) | [Site](#)

- **Built a full-stack AI learning platform** enabling **real-time voice tutoring**, achieving **95% lower response latency** by integrating **Next.js 15, VAPI.ai, Deepgram (STT), and ElevenLabs (TTS)**.
- **Boosted learner engagement by 40%** through **customizable AI companions** with configurable voices, teaching styles, and session tracking powered by **GPT-4 and Supabase**.
- **Delivered cross-platform adoption** with **responsive glassmorphism UI**, implementing **Tailwind CSS, Framer Motion, and Clerk authentication** for seamless web and mobile experiences.

Credit Card Fraudulent Predictor | [GitHub](#)

- **Engineered** a fraud detection system in Python using scikit-learn on **50k+ transactions**, applying data preprocessing, normalization, and SMOTE to address class imbalance
- **Achieved 99%+ ROC-AUC and 0.99 F1-score** by training and optimizing Random Forest and Gradient Boosting classifiers, enabling real-time fraud prediction with high precision.
- **Visualized** key patterns in transaction data with Matplotlib, improving **model interpretability** and driving insights into feature importance and risk factors.

ACTIVITIES AND LEADERSHIP

HOFSTRA C.O.D.E

Member

New York, USA

Sept 2024 - Current

- Placed top 5 in a weekly hackathon with a team of 4.
- Engaged in peer-led workshops to explore emerging technologies and share practical insights with peers.
- Contributed to open-source projects and group coding initiatives, applying learned concepts to real-world scenarios.

SKILLS

Programming Language: Java, Python, JavaScript, HTML/CSS, SQL, Dart, TypeScript

Frameworks and Concepts: NodeJs, ReactJs, Natural Language Processing, Machine Learning, Spring Boot, Bootstrap, Data Structures and Algorithms, Object-Oriented Programming, SDLC, RESTful APIs, Git/GitHub
